Nova Orin DevKit Quick Start Guide

Step 1: Connect a monitor and mouse to the Jetson AGX Orin

Step 2: Provide power to the GMSL camera board
Plug in the power supply with the barrel jack into the GMSL camera board.

Step 3: Provide power to the DevKit
Power the Jetson AGX Orin using the provided USB-C power supply. A barrel power connector is available as an alternate power input.

Step 4: First Boot Up
Log into the Jetson AGX Orin using the username and password below. When ready, open the Nova Developer Kit online documents to get started.
Default Username: nvidia
Password: nvidia
